ABOUT THE PROGRAM

The Group Consultations are open for attendance at one or multiple meetings commencing from May 2021.

The Group will run every 2 months from May – December 2021 and the group will be delivered in English. The format is open and limited to 25 participants. You choose if you wish attend a single or multiple Group Consultations. The format includes case presentations, theme base exploration, observations and discussions.

In each group meeting, 4 – 6 participants will present a case or ask a question regarding techniques or interventions. Glenda and Kaye will problem-solve with the practitioner and clarify technical information, and then the group may be invited to contribute.

This structure has the quality of both a consultation group and tutorial. It's not necessary to present a case; each participant is welcome to learn through the conversations regarding other participants' cases or questions. Those who have yet to ask questions or present a case are given priority in subsequent meetings, ensuring that as many people as possible have the chance to participate directly.

DATES AND TIMES:

We have chosen times to suit many parts of the world in the belief that this group consultation will be of interest to many.

NOTE: Times are based on Melbourne times and may vary with daylight savings. Please ensure you check the time zones and daylight saving times.

KAYE GRIFFIN

I am a psychotherapist in private practice and I specialise in providing intensive somatic trauma, grief and loss therapy and provide individual and group clinical supervision (consultation). I work within trauma and trauma related issues including addictions, attachment disorders, eating disorders, anxiety, depression, illness, death, dying, grief, loss, and crisis.

My philosophy is to work together with each client to assist them to achieve their desired goals in a calm, safe and positive way. Underlying issues often play a significant role in what and how we feel. I am trained and qualified in and use a combination of the following modalities – therapies: Psychotherapy, Brainspotting™, Animal Assisted Therapy, IFS - Parts – Ego State Therapy, EMDR, Trauma Informed Therapy, Brain Based Therapies, Somatic Therapy, Expressive Arts Therapy, Schema Therapy, Grief & Loss Theories and Hypnotherapy to assist in identifying and working with any underlying issues.

I offer individual and group supervision session for a variety of professionals within the helping areas. I can provide these in my rooms or by Skype or Zoom. I am passionate about delivering and developing more supervision skills and knowledge and it is a focus in my professional development and practice and I am a board member of The Australasian Association of Supervisors. I consider the key elements in effective supervision are to create and maintain a safe, open and honest environment that supports transformational learning and facilitates critical reflection – this underpins how I approach supervision.

I have trained my Alaskan Malamute – Emmie in Animal Assisted Therapy. We work together as a team during assessment, intensive sessions, group and supervision.
